EX. No.2b CREATION OF VALID HTML WEB PAGE

Aim

   To create a valid web page created using HTML

Description:

   A Short description about the web page

The following steps must be incorporated in the web page:

1. Change the HTML page to XHTML – highlight the changes done
2. Check whether the page is a well formatted XHTML document
3. Create a DTD and include the same in the XHTML document
4. Validate the XHTML document using the XHTML validation service (http://validator.w3.org/)

   References: Using the XHTML example text file uploaded
